PROFILE SUMMARY

Computer Science undergraduate specializing in Data Science, with hands-on experience building predictive modeling pipelines, conducting exploratory data analysis, and developing full-stack applications. Comfortable implementing core machine learning algorithms from first principles and working across the Python data science stack. Seeking to apply this foundation to real-world data and software projects while continuing to grow as a data professional.

EDUCATION

B.Sc. in Computer Science & Engineering (Major in Data Science) *Expected 2027*

Daffodil International University, Dhaka | CGPA: 3.72

Higher Secondary Certificate (HSC) — Science *2019 – 2021*

Notre Dame College, Mymensingh | GPA: 5.00

Secondary School Certificate (SSC) — Science *2017 – 2019*

Janata Adarsha Bidyapith, Narsingdi | GPA: 5.00

PROJECTS

- **Titanic & Heart Disease EDA** — Conducted exploratory data analysis and feature engineering to identify survival patterns and clinically relevant indicators, using Python, Pandas, Matplotlib, and Seaborn.
- **Machine Learning Algorithms from Scratch** — Reimplemented core ML algorithms (Decision Trees, SVM, KNN) using Python and NumPy to study model mechanics; built an end-to-end predictive modeling pipeline with Scikit-Learn.
- **DIU Smart Transport & Banking System** — Built a transport management module and a banking application with secure authentication, multi-account management, and ACID-compliant transactions, using Java, MySQL, and OOP principles.
- **Secure Vault File Encryption** — Developed a desktop application for encrypting and decrypting files at rest using AES-256 encryption, built with Java and Swing.
- **Glass Wallet Dashboard** — Designed a glassmorphism-style dashboard for visualizing cryptocurrency portfolios with animated charts, using HTML, CSS, JavaScript, and Chart.js.

CERTIFICATIONS & TRAINING

- AWS Academy Graduate — AWS Academy Machine Learning Foundations, Amazon Web Services (Aug 2025)
- Problem Solving (Basic), HackerRank (Feb 2025)
- Python (Basic), HackerRank (Aug 2023)

ACHIEVEMENTS

- Completed AWS Academy's Machine Learning Foundations program, gaining working knowledge of the end-to-end ML pipeline and core AWS ML services including Amazon SageMaker.
- Earned HackerRank certifications in Python and basic problem solving, reflecting a solid grounding in algorithmic thinking and coding fundamentals.
- Achieved a perfect GPA of 5.00 in both SSC and HSC, with a strong record in mathematics and the sciences.

KEY SKILLS

- **Programming Languages:** Python, Java, JavaScript, SQL, HTML, CSS
- **Data Science & ML:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Predictive Modeling, EDA
- **Tools & Technologies:** AWS (SageMaker), Jupyter Notebook, MySQL, Chart.js, Git
- **Software Development:** Object-Oriented Programming (OOP), Full-Stack Development, Database Integration (ACID-compliant), UI/UX (Glassmorphism)

LANGUAGES

- Bangla — Native, fluent in reading, writing, and speaking
- English — Fluent in reading, writing, and speaking
